Mr. James Sanford, P.E. Director of Electrical Engineering
Paragon engineering Services
18 South George Street, suite 400
York, Pa. 17401

Re: Letter of Recommendation

Dear Jim:

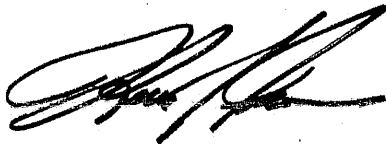

The recent completion of the Jay Group project in Lancaster, Pennsylvania is one of the finest projects our firm has ever completed. However, it is clear to everyone involved that this project would not have been such a success without Paragon's contributions to both the Buildings and IT systems. This was not a simple project, but your team brought experience to each difficult situation and guided us to the right decisions.

I look forward to working with everyone on your entire team and Paragon again in the near future. Your straightforward and open approach to engineering design in a Design / Build environment was refreshing. Your team presented the necessary information to make decisions in a clear, unbiased and friendly manner. I felt comfortable asking questions of the approach, money and schedule.

Your team demonstrated that they want to build the best buildings while keeping costs and schedule on target. The Jay Group project is a perfect example of when an Architectural firm and Engineer firm team together and work collectively to meet the goals of a project as a single team. Again, it was a pleasure to work with you and the Paragon team.

Best Regards,
