Re: Letter of Recommendation

Dear Vaughn,

Thank you for the incredible service that you have given to me, my teammates at Richard D. Poole, LLC and to our clients.

My relationship with you and your teammates at Paragon has been exemplified by timely, reasonably priced, top quality engineering and consultation. This applies to your mechanical, electrical and plumbing disciplines alike.

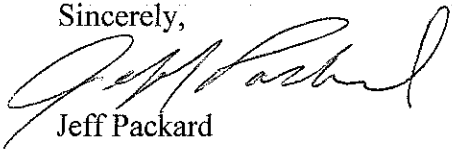

It is also noteworthy that you conduct yourself and your business with integrity of the highest caliber.

With the large number of projects that we have successfully completed with you we have utilized a great many of your available services. These have included design-build and design-bid construction documents, economic and life-cycle analysis, energy studies, document review, site inspections, project management, value engineering, shop drawing review, as-built documentation, cost estimating and agency reviews. They were completed thoroughly, professionally and on schedule.

Your cooperative approach to project solutions is a great advantage to working with you in any arrangement of a construction team. The varied nature of our building teams consisting of clients, architects, engineers, subcontractors, suppliers and utility suppliers requires the excellent level of communication you bring to the process, thereby avoiding surprises.

Paragon Engineering's desire to meet the client's needs in a way that coordinates and integrates mechanical and electrical design with the rest of the building systems is key, enhancing both project value and performance.

Sincerely,

Jeff Packard
VP of Preconstruction Services
