To Whom It May Concern:

Re: Letter of Recommendation

Timet contracted Paragon Engineering Services in 2006 to provide facilities and installation engineering for a new melting furnace at our Morgantown, Pennsylvania facility.

Paragon was extremely helpful in preparing engineering drawings used both for bidding and installation. Engineering included the 12.8 KV power distribution, building power distribution, process electrical systems, process piping and furnace installation. Paragon engineers were well prepared and worked proactively with the Timet engineering team and the primary contractors used on the project.

Timet built another melting furnace in 2008 and again selected Paragon to provide engineering services. The professional services provided by Paragon helped Timet achieve their goals of starting both furnaces ahead of schedule and within budget.

We look forward to working with the Paragon Engineering Services on future projects at Timet.

Sincerely,
