To Whom it May Concern:

Subject: Letter of Recommendation

Weldon Solutions contracted Paragon Engineering Services to perform the electrical, plumbing, and HVAC designs for its new facility located at 425 East Berlin Road in York, PA.

We found the Paragon personnel to be both very professional and knowledgeable about the building code requirements and equipment specifications for our building. They were both helpful in accommodating our wishes for the building and insuring that we complied with all the related regulations.

One of the requirements that we had was to make the building as energy efficient as possible within our budget. Although only time will tell I believe we achieved that goal.

The design was completed in a professional manner and in a very timely fashion.

We would recommend Paragon for your engineering requirements and look forward to working with them in the future.

Regards,
