

The PARADIGM

One Team, One Goal ~ Excellence

PARAGON Engineering Services, Inc.

PARAGON SELECTED FOR MAJOR PROJECTS

PARAGON PULSE

Welcome to the first ever Newsletter created by the team at **Paragon Engineering Services, Inc.** I am very proud of the progress Paragon has made over the years and am in awe that we have progressed to the size to warrant a newsletter. From the humble beginnings in a spare bedroom and kitchen table to over 30 employees with over \$3 Million in sales in 5 years is commendable. I want to thank the entire team at Paragon for making this organization one of the "Best Places to Work in PA" and for the dedication and drive to continue the trend. I look forward to sharing some insights into what Paragon is up to in the coming publications!

Vaughn Silar, President

NEW HOME FOR LEHIGH OFFICE

Our Lehigh Office, opened in 2005, moved into 2400 sq. ft. at Commerce Plaza in Allentown.

This location is strategically situated to serve our Eastern Pennsylvania and New Jersey clients.

MORGANTOWN, PA Timet Corporation

Timet Corp. of Morgantown, Pa, in conjunction with Meister Architects, selected **PES** in 2006 to design MEP systems for two 18,000 sq. ft. electron beam melt furnace buildings. The scope included HVAC, plumbing, process piping and a 10,000 amp, 480 volt electrical service with extensive power and control wiring.

BETHLEHEM, PA Portner & Hetke

Portner & Hetke Architects selected **PES** to design MEP Services for the renovations and additions to Christmas City Studio in Bethlehem, Pa. Christmas City does quality photography for many school districts as well as other commercial, wedding and individual portraits.

YORK, PA Apple BMW

HVAC Contractor Williams Service Co., Plumbing Contractor R.S. Bortner and Electrical Contractor Dietz-Nauman retained **PES** to assist in a Design/Build contract to design the mechanical and electrical services for a new 14,000 sq. ft. show room, sales office and service bay for Apple BMW in York, PA.

The Corporate Center 18 South George Street, Suite 400 ▼ York, PA 17401 ▼ P 717.854.7374

Cecil County Office 2288 West Pulaski Highway, Suite 176 ▼ Northeast, MD 21901 ▼ P 443.674.0300

POTTSTOWN, PA
Buckman's Hypo Plant

Meister Architects of Reading selected **PES** to provide MEP services for Buckman's, Inc. new chemical plant in Pottstown, Pa. This state-of-the-art facility required extensive process piping and a complex DC electric service for the production of Sodium Hypochlorite which is used in the chemical treatment of pools.

BETHLEHEM, PA
Cigars International

Burkholder Heating & Air Conditioning of Emmaus, Pa. retained **PES** to design the HVAC system for this unique cigar emporium in Bethlehem, Pa. Special attention was needed to assure adequate ventilation for the unique smoking environment of the facility.

LANCASTER, PA
The Jay Group

PES was retained by General Contractor Richard D. Poole, Inc. and assisted Dietz-Nauman Electric in the design and permitting for a 2400 amp service to serve a new 168,000 sq. ft. automated warehouse and a 54,000 sq. ft. office building in Lancaster for The Jay Group, a leader in the customer support services field.

Jim Sanford, P.E.

PESPOTLIGHT
Team Member

Jim Sanford, P.E. is the senior electrical engineer in our York office.

A native of Brooklyn, N.Y., after graduating from Penn State, Jim has spent his entire engineering career in the York area. He rose through the ranks of a national Architectural Firm from electrical designer to MEP Associate Vice President. Joining his protégé, Vaughn Silar when Vaughn launched Paragon in 2002, Vaughn and Jim have built our electrical design group to the level of competence that we have to offer our clients today. Paragon is pleased to feature Jim in our first newsletter.

PARAGON PERSPECTIVE
Industry News

PES is offering our clients a new concept called *Bridging* where we serve as the owners's agent in creating the parameters for the MEP portions of a project. We complete 35% drawings, issue RFPs, help in the selection of the design/build team and provide some construction services. Final design is either by the design/build subs, an engineer that they retain or PES.

Further discussion of this concept can be found on our web site at
