Paragon Pulse

I often get asked "What's the secret to a successful business?" My response is always "Do what you said you would do when you said you would do it." The reply is always a look of 'really - that's it...'. **Yes. That's it.** The hard part is you only say what you are going to do after you have given an issue a great deal of thought and researched all your options. Paragon declares that in their mission statement, "... provide timely, cost-effective, sustainable, mechanical and electrical engineering solutions..." Whenever we are implementing new systems or processes I consider how it improves providing professional quality services on-time and on-budget.

I'm extremely proud of the Paragon Team. I would like to **CONGRATULATE** the Paragon family for being chosen the **2012 York County Economic Alliance Small Business of the Year!**

**ONE TEAM ~ ONE GOAL:
Excellence!**

Blessings to all,
Vaughn Silar,
President

Implement and Monitor

Our vision for this year is quite clear; to be on-time and on-budget. We continue to take our projects to the next level by implementing new processes that are for the greater good of the company and our clients. Here are two projects from Maryland and Delaware that **Jason Craley, Operations Manager for the North East, Maryland office**, has taken to the next level.

Award Winning, Luna's House Edgewood, Maryland

A non-profit organization dedicated to bettering the lives of animals and their people, **have won the Award of excellence for Major renovation from the US Green Building Council Maryland Chapter 6th Annual Wintergreen Awards.**

This project is a 14,900sf structure, located on three acres of land and serves as an Animal Care and Education Center.

PESpotlight Team Member, Jason Craley

Jason is our Operations Manager for our North East, Maryland location. He was our second full-time employee hired in York, PA and has been with us for almost 9 years. He's a valuable leader here at Paragon and is a part of the Management Team. He's a designer for both HVAC and Plumbing Systems and handles LEED™ services. He also provides assessments on budget control, and fiduciary responsibility both to the company as well as our clients. We are proud to name Jason one of our leaders and call him our friend.
